Education

PhD	Osnabrück University , Physics • Investigating equilibration in disordered systems.	Osnabrück, Germany 2025 – 2028
MS	University of Cologne , Physics • Top of the year. • Specialized in solid state theory and quantum information. • Thesis on "Restricted Boltzmann Machines and Hopfield Networks".	Cologne, Germany 2022 – 2025
	Ecole Normale Supérieure de Paris , Physics • Participated in the Erasmus exchange program, focusing on advanced topics in theoretical physics.	Paris, France 2023 – 2024
BS	Osnabrück University , Physics • Top of the year. Finished with honors. • Thesis on "Influence of interactions on the efficiency at maximal power of a microscopical thermodynamic machine".	Osnabrück, Germany 2018 – 2021

Experience

Faculty of Physics, Osnabrück University , Research Assistant Worked on the VRnano project, a physical development environment for better control of laboratory experiments.	Osnabrück, Germany 2021 – 2023 2 years
Faculty of Mathematics, Osnabrück University , Teaching Assistant Tutorial lectures and exam grading.	Osnabrück, Germany 2019 – 2021 2 years

Awards

Honors branch Awarded for outstanding academic achievement University of Cologne	2022
Niedersachsen Scholarship Awarded for outstanding academic achievement Niedersachsen Ministry of Science and Culture	2021
Deutschlandstipendium Awarded for outstanding academic achievement from 2019 to 2021 Osnabrück University	2019

Teaching

Theoretical Physics III The course covers advanced topics in classical mechanics and electrodynamics. Held weekly exercise classes and provided feedback to students.	Osnabrück, Germany 2026
---	----------------------------

Theoretical Physics IV

The course covers advanced topics in quantum mechanics and statistical mechanics. Held weekly exercise classes and provided feedback to students.

Osnabrück, Germany
2025

Outreach

Volunteer at DOPPLERS

DOPPLERS is a yearly theoretical physics competition held at different German universities and supported by the German Physical Society (DPG). I organized the academic program including two speakers and held a workshop on decision-making myself. Also, I sought and acquired sponsoring for the catering. On the weekend of the event itself, I was volunteering and helping with the event in general.

Osnabrück, Germany
2026

Course instructor

Developed a 2-week course (50 hours) on quantum computing for high school students. The course included lectures, exercise lessons and a final project phase with an accompanying poster session. The course was held in Jülich, Germany, and was part of the Deutsche Schülerakademie program.

Jülich, Germany
2025
